INTRODUCTION

The 2024 **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** is provided as reference and for informational purposes. The **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** can assist plan enrollees and their practitioners in selecting clinically appropriate and cost-effective products for their patients. Formulary changes can occur quarterly, based on new medications, medical practices, and clinical guidelines. Plan enrollees can access the formulary through their CVS account at Caremark.com.

The drugs represented in the formulary have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** reflective of current medical practice as of the date of review.

The information contained in this **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** is provided solely for the convenience of medical providers. PREFACE

The **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Both brand-name drugs and generic drugs are listed in the sections. **Brand-name drugs are listed in all capital letters and generic drugs are listed in lower case letters.** There is a quick reference drug list that provides an alphabetical list of all drugs included in this document.

Individual pharmacy benefit plans may impose restrictions or not reimburse for some products. In addition, over-the-counter (OTC) products, with the exception of insulin and diabetes monitoring products, are usually not included in the pharmacy

formulary benefit. Pharmacy law requires a valid prescription for the purchase of needles and syringes in certain states. If covered in the pharmacy benefit, OTC products require a valid prescription.

Drugs represented in the **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** may have varying cost to the plan enrollee. The prescription benefit plan may alter coverage of certain products or vary copay amounts based on the condition being treated. Generic medications typically are available at the lowest cost, brand-name medications on the **STRS Ohio Commercial Retiree Formulary (for individuals without Medicare)** will generally cost more than generics.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve clinically appropriate drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version of a drug is dispensed rather than a prescribed brand-name product.

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug. Generic drugs may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic drug to produce the same clinical effect and safety profile as the brand-name drug.

LEGEND

Abbreviation	Description
---------------------	--------------------

PA	Prior Authorization: Some drugs require you or your physician to get prior authorization. You must get an approval from CVS
----	--

Caremark before you can get your prescription filled. If you don't get approval, your plan may not cover the drugs.

- QL **Quantity Limit:** For certain drugs there is a quantity limit in the amount of the drug that your plan will cover. For example: our plan provides up to 30 tablets per 30-day prescription for atorvastatin. This may be in addition to a standard one-month or three-month supply.
- SP **Specialty:** Drug is only available through a specialty pharmacy. Specialty prescription drugs typically include higher-cost drugs that require special handling, special storage, or monitoring.
- ST **Step Therapy:** In some cases, our plan requires you to try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If drug A does not work for you, We will then cover Drug B.

You can determine if your drug has any additional requirements or limits by looking at the formulary. Please contact CVS Caremark Customer Care at 1-800-756-6841 if you have any questions about the additional requirements.

DRUG TIERS

Every drug on the plan's drug list is in one of three tiers. In general, the higher the tier number, the higher your cost for the drug.

Tier	Description
Tier 1	Generics
Tier 2	Preferred
Tier 3	Non-Preferred

If your drug is not listed in the formulary, you should contact CVS Caremark Customer Care at 1-800-756-6841 to ask if your drug is covered. If the plan does not cover your drug, you can ask CVS Caremark Customer Care for a list of similar drugs that are covered by the plan. You can use the list to share with your physician and ask them to prescribe a similar drug that is covered by the plan.
